Traditional Style, Modern Comforts

The Heritage is a thermally efficient replacement for steel windows. This window uses modern technology and is still a fraction of the cost of steel windows. These Heritage windows use the latest 'Polyamide' thermal barrier technology giving superior thermal performance.

Now you can easily and affordably replace your old, single glazed, rusty steel windows with non-rusting, secure, steel look-a-like windows with modern energy efficient glazing. What's more you can do so without compromising the classic look of your home. Our Heritage windows will greatly improve security and insulation of your home, saving you money on your household bills and reducing external noise.

Our ultra slim-line profile emulates the look of steel windows. Whether combined with new or original hardwood frames, or fitted directly to brick, these windows can be made to look like the windows they replace.

Features

- Standard colours - white, black/white^(dual colour), black and brown.
- Single and dual RAL custom colours and textured paints available.
- Traditional furniture options.
- Modern multi-point locking options including Chelton Secure.
- Slim-line 47mm polyamide thermally broken, non-rusting aluminium profile.
- Can be supplied unglazed or glazed for 24mm glazing.
- Mostly internally glazed sashes for security, and ease of installation.
- Trickle vents available in head extension.
- Outer frame: 36mm; Outer frame - Sash: 56/59mm;
- Optional dummy vents for fixed lites.
- Compliant to building regulations, making this window suitable for new build as well as replacement or refurbishment projects in listed buildings and conservation areas.

Traditional Furniture With Modern Locking

Why can't you have both modern high security locking and maintain the look of your old steel window handles? With our Heritage window you can! The furniture available for our Heritage window looks traditional but drives modern multi-point locking, such as our patented Chelton Secure or Espag locking. Using our locking the security of your home is increased while maintaining the period looks.

You are not limited to just heritage style furniture, you can also specify modern style handles for a different look. All our furniture is available in a variety of finishes.

The majority of designs in the Heritage window range are internally glazed for extra peace of mind.

Colours and Finishing Touches

Your windows can be customized from a wide range of styles, frame colours and glazing types to compliment a wide variety of property styles. By using the highest quality materials, these windows will not discolour, lose their strength or corrode over time. The powder coat finish is guaranteed for 10 years.

Windows can be supplied in single or dual RAL colour (one colour inside and another out) polyester powder coat finish. Standard colours are white, black/white^(dual colour), black and brown.

Curved Openers

Create Beautiful Arched Heritage Windows and Doors

Say good bye to fixed arched windows. The Heritage system can create beautiful curved aluminium windows and doors with openers with no joins, no cuts and no draughts. Our revolutionary patented Chelton Secure locking can follow curves and operate around corners. This allows you to lock, and pull in tight, three sides of a window, even the arched head section. Locking is driven by our comprehensive Chelton handle range. Locking arched vents have never been possible before.

Using the latest computerised bending machines a minimum radius of 500mm can be achieved.

Bending is performed on the latest top of the line computer controlled section bending machines.

A vast collection of forms are used to enable bending of a wide variety of aluminium profiles. Jobs are stored on the machine so that future bends can be matched to previous jobs.

Bending machine

- Short lead times.
- Cost effective.
- Any RAL colour.
- Almost limitless window & door styles.
